

CAULT

ROADMAP

PHASE 1 – CORE PRODUCT (MVP)

The first phase focuses on delivering a fully functional, simplified market tracking platform centered around clarity, speed, and essential functionality. The goal is to establish Cault as a reliable daily tool for understanding market conditions without unnecessary complexity.

Cault will launch as a web-based application optimized for both desktop and mobile browsers, with an initial focus on the cryptocurrency market.

Key features in this phase include:

- **Market Overview (Top Cryptocurrencies)**
Real-time tracking of approximately 50 leading cryptocurrencies, displaying price and percentage changes to provide a clear snapshot of the market. Users can additionally track any asset through a customizable watchlist.
- **Interactive Charting**
Dynamic charts that update based on selected assets, enabling fast and seamless analysis without switching between tools.
- **Personalized Watchlist**
Users can track any cryptocurrency beyond the default market view, ensuring quick access to relevant assets.
- **Structured News Feed**
Aggregated news from multiple sources, categorized (e.g., informational, bullish, bearish) to reduce noise and improve clarity.

- **AI Market Assistant (Gemini/Local AI)**
Integrated AI chat allowing users to ask questions about the market, assets, and trends in a natural and intuitive way.
 - **AI-Generated Insights**
AI-enhanced experience including:
 - short summaries of news,
 - portfolio performance insights,
 - market-wide summaries highlighting key movements and trends.
 - **Manual Portfolio Tracking**
Users can manually track their portfolio with built-in performance metrics:
 - best and worst performing assets,
 - percentage changes,
 - value changes in absolute terms.
 - **AI Portfolio Summaries**
Automated explanations and insights based on portfolio performance.
 - **Basic Customization**
Personalization options including:
 - theme selection,
 - font size adjustments,
 - language settings.
-

PHASE 2 – EXPERIENCE & INTELLIGENCE

The second phase focuses on enhancing usability, accessibility, and intelligence, transforming Cault into a highly personalized and proactive daily market companion.

Key developments include:

- **Mobile Application (iOS & Android)**
Introduction of a dedicated mobile app to enable seamless daily access across devices.
- **Advanced Customization (Modular Dashboard)**
Expanded personalization through:
 - drag-and-drop dashboard,
 - flexible layout configuration,
 - deeper control over interface structure.

- **Price Alerts**

Customizable alerts based on asset price movements, allowing users to stay informed without constant monitoring.

- **Enhanced AI Capabilities**

Improved AI models delivering:

- more accurate responses,
- deeper context understanding,
- improved interaction quality.

- **AI-Driven Insights & Suggestions**

Shift toward proactive intelligence:

- automated insights,
 - contextual suggestions,
 - detection of relevant market movements tailored to the user.
-

PHASE 3 – EXPANSION & SCALE

The third phase focuses on expanding the platform beyond its initial scope and introducing more advanced functionality, positioning Cault as a comprehensive multi-asset market platform.

Key developments include:

- **Multi-Asset Market Expansion**

Extension beyond cryptocurrency into additional markets such as:

- stocks,
- forex,
- and other financial instruments.

- **Portfolio Synchronization**

Integration with external platforms, enabling:

- wallet synchronization,
- exchange account integration,
- automatic portfolio tracking.

- **Advanced Portfolio Management**

Enhanced tools for tracking, analyzing, and understanding portfolio performance across multiple asset classes.

- **Premium Features (AI Expansion)**

Introduction of optional premium functionality, focused primarily on:

- expanded AI usage,
- more advanced AI capabilities,
- enhanced insights and personalization features.
